

## Revolution series

Revolution adds a new twist to linear seating. Its unique user friendly linear units and pod units offer an updated ergonomic appearance. Clear access underneath each unit means handbags, small luggage, backpacks, etc. can be

stored underneath out of the aisle for clear unobstructed traffic. The linear units with their divider tables create a unique "personal space" for each occupant. Revolution utilizes a one piece aluminum leg assembly, spider, and

heavy duty steel support bar for its chassis. Revolution is ideal for all forms of public seating including hospitals, universities, airports, courthouses, etc. Benches in seat and table configurations as well as seating only units are part of the

Revolution Series. 2006 independent surveys have concluded that the divided units receive greater utilization because of the extra "comfort zone" as opposed to standard linear units. The benches are ideal for those areas requiring seating for short

term use and areas with limited space. Revolution is made with high resilient molded Ultrafoam®, a Chromcraft exclusive. Ultrafoam® is made with fire retardant chemicals added to exceed CAL-117 and it is backed by our life-time warranty. Revolution

is constructed using a heavy duty square tube support bar for mounting multiple seat units in tandem position. The square tube support bar is mounted on two (or more) die cast polished aluminum bases.

Seats are mounted to the heavy-duty square tube support bar by clamping the aluminum base (or 11 gauge steel clamp brackets) to pre-

mounted seat "spiders" with two socket screws. The square tube support bar, the steel clamp brackets and aluminum spiders are pre-finished

with a baked-on enamel finish. The arm version units include a urethane over steel arm pad for ultimate comfort and durability.
