

## Flipp Tables

Are you tired of lifting and carrying tables to reconfigure for your next meeting? Never pick up another training table. Chromcraft in conjunction with Synergy Product Development has the

answer to your meeting room dilemma with FLIPP! FLIPP tables have an ingenious flip top mechanism which uses a cable activated release (CAR) handle located under the center of the top, allow-

ing the mechanism to release and lock using a single lever. The fabric modesty panels can be changed in the field. Select from the pre-selected fabrics or choose your fabric to compliment your

own decor. The tables will nest with or without modesty panels. Let your imagination be your guide and choose FLIPP! The mechanism construction consists of an injection molded

Mechanism allows top to rotate so that tables can be nested.

body with aluminum pivot plates along with rubber bumper pads to protect the tops when nesting the tables. The elegant arched leg design is constructed from sixteen gauge 1.25" diameter steel

tubing with 3" locking casters for ease of mobility and stability. FLIPP is available in 24" or 30" depths and 60" or 72" widths. Choose from any of our ten standard paint finishes on the back

page of this brochure. FLIPP tops are .75" thick with .050 " high pressure laminate and phenolic backer laminate for lighter weight allowing easy operation. A black T-mold edge is standard for

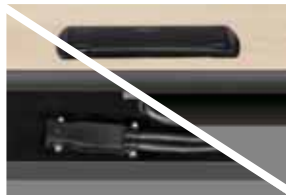

rugged durability. The tops have square tubular metal warp strips for added strength to prevent sagging. Ganging devices are standard equipment on all FLIPP tables.

WIRE MANAGEMENT/POWER OPTIONS

Grommet Only

Optional SG (Single Grommet) or TG (Twin Grommets) mounted in top.

Wire Mgmt. Tray

Standard on all tables when power options and/or grommets are ordered. Provides a convenient hinged tray under table top to hold and hide wires.

Power - AO11 (non linking option)

Optional power provides a duplex receptacle and two data openings. SP or TP must be ordered separately with this option. One or two per table.

Daisy Link (ALP1 BK - ALP8 WH)

Optional system to link up to eight tables. Link one includes a ten foot power cord, duplex receptacle and voice data openings, links 2 through 8 ALP2-BK/KD - ALP8-WH have five foot cords which are color coded and sequence connectable. Each link includes a duplex type receptacle and two voice data openings.
